WORK IN PROGRESS

The Intergenerational Impact of School Construction on Child Health Outcomes

with Samia Badji, Anthony Harris & Maame Esi Woode

This study focuses on how the accumulation of human capital can bring spillovers to the next generation. It examines the intergenerational impact of education. It exploits the mass school construction program in 1970 to see its long-term impacts decades later.

The impact of community driven development on basic services: Evidence from Village Fund in Indonesia

with Maame Esi Woode, Samia Badji, & Anthony Harris

This study examines how physical capital accumulation is important to support human capital accumulation. It focuses on the impact of community-driven development program on health outcomes. It investigates the impact of Village Fund (VF) in Indonesia on a set of health-related outcomes.

Religion and vaccination: Evidence from Indonesia

with Maame Esi Woode, Samia Badji, & Terence Cheng

This study examines considerably underexplored factors that might have played an important role in human capital investment. It investigates the impact of fatwa, Islamic legal ruling, on vaccination.
